PFS:Plan Version A:00
http://vetusware.com/download/PFS_Plan%20Version%20A_00/?id=12799
PFS: PLAN is a computer program that you can use for all types of numerical planning, tracking, analyzing, and reporting . With PLAN, you organize your numerical data into rows and columns, creating a report called a worksheet   PLAN is integrates with the other programs in the PFS Family of Software: PFS:GRAPH PFS:WRITE PFS:FILE and PFS:ACCESS.   PLAN is powerful enough to serve most planning needs, yet it is easy to learn and use. PLAN uses plain English, making it easy to type your worksheet and to understand it after you've typed it.   This archive contains one 320K floppy disk image.   Important: this disk contains copy protection. Raw and ImageDisk formats will not recreate usable media. (The copy protection uses an intentional duplicate sector on track 5 head 0)   For your convenience, an unprotect has been applied to the raw disk image and extracted file set.   Note: This disk is formatted for DOS 1.x, and may not open in WinImage.   Works with PC-DOS 1.1, MS-DOS 1.25 or higher.
