The Semware Editor Professional 3.0 (Test-Drive)

http://vetusware.com/download/The%20Semware%20Editor%20Professional%203.0%20_Test-Drive_/?id=12883

WIN32 CONSOLE VERSION - Test-Drive 60-days Trial. The SemWare Editor Professional/32 v3.0 - Test Drive (for Win95/98/Me/NT/2000/XP). Text mode (console) text editor. Offers Multilevel Undo/Redo; long filename support; Multiple files/windows; option to search subdirectories for matching files when loading or selecting files; context-sensitive help system; color syntax highlighting; regular expression search/replace; incremental search; Optionally specify search operations to include all loaded files, current marked block, or current line; macro to search external files for a string; dynamic visual brace match macro; option to resize your screen to whatever columns/rows Windows allows; hex/binary editing; spelling checker; interactive configuration; macro programming language with debugger; multi-language compiler support; configurable menus/keyboard/commands; column blocks; bookmarks; templates; sort; compare files; compressed view; and MUCH more! Ideal for anyone that needs to manipulate text.

Wise Installation System 9.02

<http://vetusware.com/download/Wise%20Installation%20System%209.02/?id=12898>

For Windows 9x/NT This is the last release of Wise Installation System based on the traditional Wise Script technologies. Also it's still capable of making Win16 installer package. Later releases are only capable of making Windows Installer installation packages, and only included the WiseScript editor which is stripped down from this version. SN: 9200034434
