Framework II
http://vetusware.com/download/Framework%20II/?id=13582
Framework II contains a larger, faster and more powerful spreadsheet and an advanced word processor that includes an 80,000-word spell checker, visible page breaks and a built-in mailmerge capability. The two primary functions are supported by fully-integrated telecommunications, database, outlining and graphics modules in addition to an expanded and well-documented programming language. Framework II retains a consistent command structure throughout all functions, providing users with unparalleled ease of learning.
