Advanced DOS-Mode Text Viewer with Highlight, Favorites, Bookmarks, Mask search, Full Screen and more.

ViewS 2.0

ViewS is just a fileviewer mainly for textfiles, but also suitable for browsing through raw binary data. Unlike nearly all other viewers it doesn't scroll the display (text-)line by line, but pixel by pixel which makes reading of long texts much more comfortable. (This is called soft- or smoothscrolling - therfore the "S" in ViewS. =)
