Recently I've met very interesting person - sv3ora from Greece. He is computer and telecommunications engineer with broad interests. You can find his researches and developments on the site: http://www.qrp.gr/

sv3ora has assembled his own compilation of DOS software - X-DOS, based on MS-DOS 6.22, which may be useful for everybody.

You can download the collection from page http://vetusware.com/download/X-DOS%2010/?id=11973
