Microsoft Visual Basic 3.0 Standard Edition
http://vetusware.com/download/Microsoft%20Visual%20Basic%203.0%20Standard%20Edition/?id=12019
Microsoft Visual Basic 3.0 was the most popular version for Windows 3.x development. It is the last to create executables that do not require complex installation, with small runtimes, and minimal memory usage. The standard version does not include Crystal Reports or the setup generation wizard like the Professional edition. This is also the last version compatible with Windows 3.0. This is a 16-bit Windows 3.x application. Includes three 1.44mb setup disks.
