DVCopy 2.00
 http://vetusware.com/download/DVCopy%202.00/?id=14682
Shareware: DVCopy is a file copying utility, that is built to work under   DESQview. It
combines many features which are handy to any   DESQview user. DVCopy's top feature is
its ability to read/write floppy drives   without causing a complete slow-down on all other
tasks.   Also, DVCopy is (optionally) fully share aware. It recognizes when a specific   file
is locked, and tries to open it for a definable amount of   time/retries until it skips it, and
goes to the next file,   (optionally) adding it to the end of the "to-copy" queue, for a   later
retry.   In addition to these DV-Specific features, DVCopy has dozens of   others,
including 4DOS and NDOS compatibility, fast-move option,   progress-indicator display, full
subdirectories copy, and more.
