FDOS SYSTEM DISK (SWTPc6800) 1.x
https://vetusware.com/download/FDOS%20SYSTEM%20DISK%20_SWTPc6800_%201.x/?id=17184
The first operating system written by Technical Systems Consultants for the SWTPc6800 computer and its DF-68 floppy system. Also called miniflex, but this name confusingly was also used for the first version of FLEX (Flex 1.0, very different disk structure!).The FDOS system disk has been tried on a SWTPc6800 with MP-A motherboard, MC-2 disk controller and the MF-68 dual drive system. The format is SS SD 35tr, 10 sectors/tr, 256 bytes/sect. Interleave =1, gaps are G1 =7 G2 =13 (as given by Imagedisk)
