"arcers" ????
http://vetusware.com/download/arcers%20____/?id=12527
From the nineties (some older). Several programs to manage ARJ, BTOA, BOO, ZOO, LHA, LZH, ARC, PAK, xxQ, RAR, UC2, SEA, CPT, SIT, ZIP, UUE, etc. (mainly but not only for DOS).

0cd CD-Rom Emulator 7.1
http://vetusware.com/download/0cd%20CD-Rom%20Emulator%207.1/?id=12530
CD-ROM emulator with source-code (asm).

FakeCD 1.0
http://vetusware.com/download/FakeCD%201.0/?id=12531
Simulates a CD-ROM drive with a directory of a hard drive. Don't need to load a CD-ROM driver or MSCDEX. (also works in Win3.x)

File Finder Pack 4.9
http://vetusware.com/download/File%20Finder%20Pack%204.9/?id=12528
"Finds Files and DIRS on normal, networked drives, compressed files and CD's. Also locates duplicated." Includes BRZ viewer from California Software Design. (fully functional shareware)

LSORT 3.41
http://vetusware.com/download/LSORT%203.41/?id=12529
Comprehensive file sorting system, "...will sort MSDOS and OS2 files, dBase II and dBase III databases."

MCB- Memory Information 1.0
http://vetusware.com/download/MCB-%20Memory%20Information%201.0/?id=12533
Memory Info: address, size, id, environment, etc.

Miracle-Driver 2.06
http://vetusware.com/download/Miracle-Driver%202.06/?id=12534
USB Drivers. Allows USB peripherals to be accessed from the DOS command line, seems to work with many USB controllers. No documentation. I included sample config.sys and autoexec.bat settings.
