Microsoft BASIC-80 Rev. 4.3 [IMSIA] [CP/M-80]
http://vetusware.com/download/Microsoft%20BASIC-80%20Rev.%204.3%20%5BIMSIA%5D%20%5BCPM-80%5D/?id=13297
Contains one Single-Sided Single Density 8-inch disk image in "standard" CP/M format.   This disk contains MBASIC 4.3, with a copyright date of 1977. It also includes a number of sample basic files, with copyright dates of 1977-1980.   This version of MBASIC does not seem to run properly in 22Nice.   Unlike other mislabeled entries on this site, this one really does seem to be from ~1977.

Vistapro 3.05 for DOS
http://vetusware.com/download/Vistapro%203.05%20for%20DOS/?id=13296
Vistapro is a three-dimensional landscape simulation program. Using U.S. Geological Survey (USGS) Digital Elevation Model (DEM) files, Vistapro can accurately recreate real world landscapes in vivid detail. It can also create fractal based landscapes, and provides many customizations. Vistapro originated on the Amiga and also had a Macintosh port.   The DOS version supports high resolution VESA graphics modes.
