CD-ROM Device Driver 2.14

http://vetusware.com/download/CD-ROM%20Device%20Driver%202.14/?id=14501

Floppy disk image. I have no idea what drive this is for other than that it is an IDE drive, the disk contains the "VIDE-CDD.SYS" driver file which appears to be an Acer driver but may also work with other drives. Includes French, German, Italian, Japanese, and Spanish localisation in addition to English. Also includes Adaptec UDF Reader for Windows 9x and Windows NT.
