IBM OS/2 2.0 S.E. Version 2.0 Level 6H.177 - INCOMPLETE

This is a sadly incomplete copy of the OS/2 2.0 6.177 beta. "System" disk 1 of 14 is missing. and disk 3 is faulty. Perhaps it will help if someone else has a different incomplete copy. ------ The 6.177 Pre-release, also known as the "Limited Availability" release, was created as an end-of-year release to fulfill promises for a 1991 OS/2 2.0 "release". Notice that the labels do not indicate it is a pre-release. IBM actually provided a level of official support for this release. Archive includes nineteen 3.5" 1.44mb floppy disk images.
