Thank you Jesus Christ! I have worked hard on this one to bring to you something new in honour of my mom Huong Thi Thuyen Vu# Of course my father Nguyen Binh Thuy is included in the honour by the mere fact that he sent me to school for programming. My two sisters are way ahead of me: Nguyen Khoa Thuyen and Nguyen Khoa Thi; I am the sole programmer of this software: Nguyen Khoa Tien

Note: It is a text printer with numbers with the bare minimum of the only punctuation of a period and exclamation.

It will twist 4 times or so before waiting for your input to exit.

It will work in DOSBox too however technically the speed will be extremely slow.
