MS-BASIC 1.21 for the TI Professional Computer

http://vetusware.com/download/MS-BASIC%201.21%20for%20the%20TI%20Professional%20Computer/?id=15240

This is a special version of Microsoft Basic specifically tailored for the Texas Instrument Professional Computer. Unlike most Microsoft BASIC interpreters, TI did not bundle it with their MS-DOS, but sold it as a separate product instead.   The TI Professional Computer was a non IBM hardware compatible x86 machine that ran a special adaptation of MS-DOS. As a result, this adaptation of MS-BASIC is also not 100% compatible with BASIC programs written for IBM PC. Important: This software will not run on an IBM PC or compatible. It will only run on a TI Professional Computer.   Archive includes one 5.25" 160k (8-sector single sided) floppy disk image.
