Subject: PDF Compression for Windows XP
Posted by xkaes on Wed, 08 Jul 2020 15:23:14 GMT

I'm trying to find PDF Compression for Windows XP.

Sounds simple.

The free ones on-line work fine -- for small files. With large files, you need to "get their PRO version", "give them your credit card #", "agree to download additional software", etc. etc.

The ones I've found for free download trials either only work with Windows 7 or higher, produce a .NET FRAME error that I can't fix (I have .NET FRAMEWORK 4 installed), report that I have to be using XP (I have XP SP3), etc.

I can't find any PDF Compressor in the database of this website, so I'm wondering if anyone has any suggestions.

This should not be difficult, but so far it's impossible.

Thanks.
