Digital Research GEM Desktop 1.1
https://vetusware.com/download/Digital%20Research%20GEM%20Desktop%201.1/?id=17745
GEM is a graphical application environment that runs on top of MS/PC-DOS. It was built on the technology of Digital Research's GSX portable runtime (Used in DR Draw and DR Graph) . Notably, a port of GEM and CP/M was used as the primary GUI on the M68k based Atari ST. GEM was also bundled with Amstrad computers.

PS/1 ROM Customization Utility

This is the DOS-Based ROM customization utility that came with the IBM PS/1.

SCO Xenix 3.0 for Apple Lisa
https://vetusware.com/download/SCO%20Xenix%203.0%20for%20Apple%20Lisa/?id=17742
Xenix was the variant of UNIX originally published by Microsoft, later sold to SCO. It added a variety of technical enhancements over System V Unix, including a menu-driven business shell. It was ported to many different platforms from a PDP-11 including the Altos 8600 (First x86 port), IBM PC, Intel System 86, TRS-80 Model 16, SCP Gazelle II, and Apple Lisa.   Images are in Apple DiskCopy 4.2 format.

SpinRite 4.0
https://vetusware.com/download/SpinRite%204.0/?id=17740
SpinRite, by Gibson Research, is a tool that can diagnose, repair, and rejuvenate the low-level formatting and optimize the interleave of MFM and RLL (ST412/506 interface) hard disk drives. Its pattern testing ability is also useful for verifying the operation of SCSI and IDE hard drives. Spinrite 4 adds a faster pattern testing method and increases support for larger drives.
