CD *.iso image found in the downloadable *.zip file. Tried and tested on a virtual Windows 3.11 system, running under DosBox-X on a Windows 10 Host. Should probably also work on genuine vintage hardware running Windows 3.x/9x natively. Kindly note: Win32s is required (if not already installed) if running on a Windows 3.x system and is found in the installation CD.

MS IntelliPoint 1.1 for the Microsoft Mouse 1.1
