#### AA (Astronomical Almanac) 5.4

[http://vetuware.com/download/AA%20\\_Astronomical%20Almanac\\_%205.4/?id=12432](http://vetuware.com/download/AA%20_Astronomical%20Almanac_%205.4/?id=12432)

Precise astronomical ephemeris calculator (input to aa.exe is by single line responses to programmed prompts). Edit "AA.INI" for local circumstances.

#### Coeli 3.86

<http://vetuware.com/download/Coeli%203.86/?id=12441>

Astronomy - "An Electric Planisphere" (antecessor of 32-bit's Stella 2000). Used to be popular among stargazers (evaluation only)

#### Dungeon Master 2 The Legend Of Skullkeep

<http://vetuware.com/download/Dungeon%20Master%20%20The%20Legend%20Of%20Skullkeep/?id=12433>

Classic dungeon crawler for DOS, sequel to Dungeon Master.

#### EI-Fish SVGA

<http://vetuware.com/download/EI-Fish%20SVGA/?id=12436>

Breed unique fish and create fish tanks in this semi-sim game. Maxis later acquired this and sold it.

#### GALSAT 5.3

<http://vetuware.com/download/GALSAT%205.3/?id=12434>

Excellent astronomy program that will predict and display the positions of the Jupiter's four largest moons, the Galilean Satellites. Designed for VGA or SVGA monitors.

#### Gemfire

<http://vetuware.com/download/Gemfire/?id=12442>

Gemfire (aka Royal Blood) is a fantasy strategy with rough European and Celtic inspirations. One or many players can play, with multiple scenarios to choose from. Each player will align with a faction, each owning a particular gem to command.

#### GIFDESK 4.5

<http://vetuware.com/download/GIFDESK%204.5/?id=12430>

"GIFDESK is a utility to view many of your GIFs at one time on a VGA system."

#### H2C 5.0

<http://vetuware.com/download/H2C%205.0/?id=12437>

"Artificial Intelligence" stand-alone chat program. User configurable. Must load one of the .DAT files (e.g. "h2c parry.dat"). Beware: content can be daring :-)

#### Moon Manager

<http://vetuware.com/download/Moon%20Manager/?id=12438>

AStronomy. Graphics display of the face of the Moon, identify craters, list features, etc.

### PC DOS Shell 7

<http://vetusware.com/download/PC%20DOS%20Shell%207/?id=12440>

Dosshell (PC DOS Version 7, 1993), includes PC DOS Editor 3.13V (1994).

### PC-MENU 1.04

<http://vetusware.com/download/PC-MENU%201.04/?id=12439>

Easy customizable menu/shell/program launcher. (freeware)

### QuickDir 1.31

<http://vetusware.com/download/QuickDir%201.31/?id=12431>

Indeed a nice and useful Dos/Archive Shell. Shareware version :-)

### The\_Sky 3.00

[http://vetusware.com/download/The\\_Sky%203.00/?id=12443](http://vetusware.com/download/The_Sky%203.00/?id=12443)

"Graphics Astronomy Program", from the company later renamed "Software Bisque". This is a old version, very limited compared with later editions of this title. After install, one must use ENTER (local circumstances configuration), SPACEBAR to plot the sky, "A" - arrow (cursor/pointer, no mouse support), "I" - Info on object under pointer, "C" - constellations lines, etc. Just a curiosity to my fellow stargazers/amateur astronomers.

### VDE Editor 1.93d

<http://vetusware.com/download/VDE%20Editor%201.93d/?id=12435>

Small, fast, powerful text editor with many unusual word processing features: multiple files, auto format, macros, etc.

### VPIC 6.0

<http://vetusware.com/download/VPIC%206.0/?id=12429>

File viewer/converter for EGA, VGA and SuperVGA display adapters. (fully functional evaluation)

---
