123R25J VerUP R2.5J (JA)

<http://vetusware.com/download/123R25J%20VerUP%20R2.5J%20JA/?id=13023>

Update version for PC-98,FMR,DOS/V

FIRM.COM 3.21

<http://vetusware.com/download/FIRM.COM%203.21/?id=13022>

FIRM.COM is a simple to use DOS Floppy image reader/maker. It is compatible with files used by many other disk image reader/writers. It is capable of reading/writing disks of other systems, Unix, Linux, later Mac and some other disks. Image files can be written back to disks of a larger capacity than the original for at least FAT systems! Say a 1.2MB floppy is saved to an image file and the user wishes to restore to a 1.44MB, the image file would be written back correctly for at least DOS systems.
