Jesus Christ! Bless GOD, Jesus Christ, Mary, and The Holy Spirit# Then bless my real mom Huong Thi Thuyen Vu. Honours to my real mom and my real dad Nguyen Binh Thuy. Congratulations to my real two sisters Nguyen Khoa Thuyen and Nguyen Khoa Thi. My name is Nguyen Khoa Tien. Well to my surprise I've tested this on WIN2KPRO and it works so far on my end. I didn't test it until the end yet so it might still glitch. Thank you Jesus Christ.

Well those of you who have MS-DOS 6.22, DOSBox 0.74, etc. would normally get my softwares on the DOS section. My DOS work even gets carried over to 32bitXP at times. Today I just happened to check if it would work on Windows2000(SP4). I couldn't get it to finish on my end the original software so I tweaked it a bit and shortened the Intro by cutting one scene out. It worked until the very end on my end. I hope it works on your computer too. Thank you for trying out my softwares.

Well I've been working hard under the grace of GOD 0 A.D.; many of you know we cannot see GOD but GOD is able to see all of us people! Unlike a person who has a camera and sees people GOD does not need a camera somewhere in our place# GOD is all knowing and knows all at the same time.

Jesus Christ! Bless GOD, Jesus Christ, Mary, and The Holy Spirit# Then bless my real mom Huong Thi Thuyen Vu. Honours to my real mom and my real dad Nguyen Binh Thuy. Congratulations to my real two sisters Nguyen Khoa Thuyen and Nguyen Khoa Thi.

Content: GOD 0 A.D. is my creator through my real two parents!!!

All the amazing contents you've seen comes through GOD 0 A.D.; My real parents gave me a base and they've always told me about GOD 0 A.D. one way or another ever since I was a youth I could remember. To this day you see in my programs many special affects inspired GOD 0 A.D.

through my visions!!!!!

Here is the same INTRO for Win2K with Source Code in Borland Assembler 4.1. It has been tested all the way on VirtualBox with Windows 2000 Professional with Service Pack 4. Thank you!

Here today on September 18 2016 at 1:50am I've been able to patch up a few bugs with the help of DOSBox 0.74 and WinRAR 3.93. With the inclusion of these two softwares I'm now able to give people using Microsoft Windows 2000 the same benefits that people using DOS has. Mainly the speed has been normalized so it no longer is too fast compared to DOS.

Please remember ESC exits. Thank you. Oh! And the blank screen is where you can type something out at your option.

Here you can backspace and there is more error checking to prevent too much out of boundary. The only out of boundary is when the text gets below the screen. At that time just delete to go back up a line. Thank you!

Jesus Christ! Bless GOD, Jesus Christ, Mary, and The Holy Spirit# Then bless my real mom Huong Thi Thuyen Vu. Honours to my real mom and my real dad Nguyen Binh Thuy. Congratulations to my real two sisters Nguyen Khoa Thuyen and Nguyen Khoa Thi.

Content: Thank you 0 A.D.

Recently my INTROs seem to have been quarantined by Microsoft for their Windows computers. When you run my INTROs it would not allow certain files to extract. I've since had two options:

1. I had to rename the files to txt and copy them back to their original state before running them in order to circumvent this.
2. I had to make it all self contained into one executable file like in this post.

So whatever the reason(s) I've taken steps to keep the updates coming. I hope you continue enjoying my softwares long after I'm gone#

Well this INTRO has come a long ways. I've continued on the game section of the INTRO. When you reach the screen with the clouds you can move the clouds around with the keys a d s w. You release the INRI towards the exit. If it is lined up right Jesus Christ comes out of the clouds. If you missed then Jesus Christ remains hidden. Spacebar releases the INRI while q quits. Have fun I hope?

In this one there are two. One is a direct run on the system. The speed will be calibrated for Win2K. The other is through DOSBox 0.74 and mimics the speed of a 25mhz DOS machine so far that is possibly estimated.

Please give all proceedings to the church (any church of Jesus Christ will do) if there should be any doubts from outsiders to whom this software belongs!

Otherwise the main portion that can be verified goes to my real immediate family:

1/4: mom Huong Thi Vu
2/4: dad Nguyen Binh Thuy
3/4: sis Nguyen Khoa Thuyen
4/4: sis Nguyen Khoa Thi

I Nguyen Khoa Tien would be the last however I am speaking just in case of my untimely death.

Well I guess you can call this a leaked software since the names might not be finalized for Christmas. It is just my immediate family and relatives right now listed on the second screen.

I didn't even get to test it out yet on Win2K or WinXP or any other Win hehe.

Here is the same DOS program ported to Win2K. It should also work in XP and possibly certain other windows. If it doesn't work you could always use DOSBox 0.74 even on a Mac and other systems so long that you download the original DOS one.

I've been working hard on a whole package. It's finally here. This zipped file should be portable on all systems where it has a version of DOS installed. I've only been able to test it on 32bit XP and 32bit Win2k. If you'd like it to run on DOS just extract the files and move it into a DOS directory including the picture then run AD. Thank you!
