Microsoft Windows 1.03 [HP Vectra OEM]

This is an HP OEM of Microsoft Windows 1.03 specifically intended for use on the original HP Vectra Personal Computer. The HP Vectra model 45945 was an 8-mhz 286 that was somewhat IBM AT compatible, but required special versions of some applications. Specifically, this release of Windows 1.03 supports the "HP Multimode with HP Monochrome or Color Display (B/W only)" video adapter.
