#### LANtastic Network 4.0

<http://vetusware.com/download/LANtastic%20Network%204.0/?id=12829>

LANtastic is a peer-to-peer local area network (LAN) operating system for DOS, Microsoft Windows and OS/2. LANtastic supports Ethernet, ARCNET and Token Ring adapters as well as its original twisted-pair adapter at 2 Mbit/s. Its multi-platform support allows a LANtastic client station to access any combination of Windows or DOS operating systems, and its interconnectivity allows sharing of files, printers, CD-ROMs and applications throughout an enterprise.

#### Lotus 1-2-3 Release 3 For DOS 3.0

Eight floppy images

#### Memory CommanderCommander v3.03 3.03

<http://vetusware.com/download/Memory%20CommanderCommander%20v3.03%203.03/?id=12818>

Even if you use QEMM, 386MAX, DOS 5 or any other memory manager, your PC has wasted high ram, unless you have Memory Commander. MC is the only 386/486 memory manager that recovers the unused high RAM and adds it to low DOS. MC automatically loads your TSRs and Drivers and optimizes your high RAM. Then the unused high RAM can be added to low DOS, significantly increasing the standard 640K.
