Microsoft Windows 3.11 3.11

<http://vetusware.com/download/Microsoft%20Windows%203.11%203.11/?id=12837>

3.11 was a minor kernel update to 3.1. Although "3.11" is often associated with Windows for Workgroups 3.11, this release does not contain the "workgroup" networking. This is a patch that is to be applied to an existing Windows 3.1 installation although standalone releases with the patch applied have been published.
