Borland C++ 4.0

<http://vetusware.com/download/Borland%20C%2B%2B%204.0/?id=12906>

Borland C++ targeted the professional application development market, while Turbo C++ targeted the home and hobbyist market. Borland C++ included additional tools, compiler code-optimization, and documentation to address the needs of commercial developers. This version requires Windows 3.1 or later. BCPP 4.0 drops the DOS IDE. It includes a Windows IDE, Turbo Debugger, Borland Resource Workshop, and documentation files. This is the full CD version.
