32x DDK MAR01_95

http://vetusware.com/download/32x%20DDK%20MAR01_95/?id=12919

This is the much sought after, SEGA 32x DDK. It includes assembly examples for the Sega Genesis, Sega CD, and a port of GCC to the SH2 / COFF for the 32x and the Sega Saturn. Also includes a bunch of technical bulletins, and internal sega tools, sample source code (to the famous SEGA logo on almost all carts!) etc. A must have for even the casual SEGA fan!

This is the TomSoft unofficial SEGA genesis/megadrive SDK. Includes a C compiler, assembler, headers libraries and documentation. Also has a debugging emulator, and examples. "Tomsoft is the development alias of Chinese programmer Tommy Xie, a former programmer of Dragon Co. who developed SDKs for the Famicom and Sega Mega Drive and would make his own games sometime after leaving around the turn of the century. He left the unlicensed games industry in the mid-2000s and released his Mega Drive SDK to the public in 2008" Several games have been made with this SDK.
