ATC2K Air Traffic Simulator V7

<http://vetusware.com/download/ATC2K%20Air%20Traffic%20Simulator%20V7/?id=11881>

It is a radar simulator programme for the Win95+ . It is used on any normal PC . There are , however , no connections to other PCs and it does not run with multiple sector configuration as it was made only for instructors and exercise designers . It may be used equally well for ACC or APP environment without exception . It is the easiest one to simulate any environment with many aerodromes , multiple runways , ACC sectors , airways etc. It can simulate entire FIRs with all their APP-ACC units .
