The_Sky 1.04 Level II

http://vetusware.com/download/The_Sky%201.04%20Level%20II/?id=13218

This an INCOMPLETE version of this truly amazing astronomy program, lacking some catalogue files. Although, it displays accurately sky view and solar system objects to chosen location and the menu "Tools" (with eclipse finder, jovian moons and moon phases). So, you have the essentials. Works in all 16 and 32 bits versions of Windows, AFAIK. Program must be stored in C:\Sky.
