Microsoft BASIC Compiler 1.0 for Mac

<http://vetusware.com/download/Microsoft%20BASIC%20Compiler%201.0%20for%20Mac/?id=13276>

This compiler is intended as a companion product to Microsoft BASIC Interpreter 3.0 for Mac, which was release at about the same time. It can compile any Microsoft BASIC for Mac application in to a standalone application.

Microsoft BASIC Compiler 5.36 for ACT Apricot

<http://vetusware.com/download/Microsoft%20BASIC%20Compiler%205.36%20for%20ACT%20Apricot/?id=13277>

This program compiles Microsoft BASIC-86 code in to standalone executables. This 3.5" disk image can ONLY be read by an ACT Apricot computer. However, the files appear compatible with regular MS/PC-DOS.

Microsoft BASIC Interpreter 1.0 for Mac

<http://vetusware.com/download/Microsoft%20BASIC%20Interpreter%201.0%20for%20Mac/?id=13278>

Microsoft BASIC Interpreter for the Mac is a GUI based implementation of Microsoft's BASIC product. It can make use of the Macintosh's mouse, graphics, windowing, and more. This version does not include a compiler. A separate Mac compiler product was released later in 1986. This archive contains one 400k disk image in raw sector format.

Microsoft BASIC Interpreter 2.0 for Mac

<http://vetusware.com/download/Microsoft%20BASIC%20Interpreter%202.0%20for%20Mac/?id=13279>

Microsoft BASIC Interpreter for the Mac is a GUI based implementation of Microsoft's BASIC product. It can make use of the Macintosh's mouse, graphics, windowing, and more. This version does not include a compiler. A separate Mac compiler product was released later in 1986. This archive contains one 400k disk image in raw sector format.

Microsoft BASIC Interpreter 3.0 for Mac

<http://vetusware.com/download/Microsoft%20BASIC%20Interpreter%203.0%20for%20Mac/?id=13280>

For m68K based Macintosh computers running System 1 to 6. Microsoft BASIC Interpreter for the Mac is a GUI based implementation of Microsoft's BASIC product. It can make use of the Macintosh's mouse, graphics, windowing, and more. This version does not include a compiler. A separate Mac compiler product was released about the same time as this version. This archive contains one 400k disk image in raw sector format. (At the time of this posting Vetusware has no "Mac" selection for Operating System type)

Satellites of Saturn 2.0

<http://vetusware.com/download/Satellites%20of%20Saturn%202.0/?id=13281>

Astronomy - Accurate positions of satellites. Input timezone and circunstancies (e.g. date) to plot.
