Bersirc IRC Client 2.2.14

<http://vetusware.com/download/Bersirc%20IRC%20Client%202.2.14/?id=13388>

An old lightweight IRC Client that its website is down so its hard to find the newest version or finding the software to download it.

File Splitter with Parity 1.0

<http://vetusware.com/download/File%20Splitter%20with%20Parity%201.0/?id=13379>

Have you ever wanted data backup that works just like RAID now you can, with WinParity. It uses GSplit to split the file and this program creates a parity set(a file ending with .XOR). If one of the files is missing you can recover it just like with RAID. I hope you guys can figure out how to use it! I will make a youtube video soon. It has not been tested under windows xp, only on Windows 7 and Windows 10, but suspects it to work with any windows version xp or above. Plus you can stream splitted video and audio files with it without unsplitting them,good for sharing the files over the internet or for just saving space without have to create a new unsplit file. This version is portable, meaning you can use it without installing it. The youtube video will be uploaded at <http://wpyoutube.delphijustin.biz> so if you get a page not found error the video hasnt been uploaded
