german installation disks - disk "Install" is modified to run in virtual machines like "VirtualBox". If you like to use PS/2 mouse you have to install the drivers manually. Use "MSPS201.SYS" for PS/2 mouse. To do so unpack the file "msps201.sy@" from disk 2 (unpack msps201.sy@ c:\os2) and edit the config.sys file: DEVICE=C:\OS2\MSPS201.SYS DEVICE=C:\OS2\MOUSE.SYS TYPE=MSPS2\$

IBM OS/2 2.0 german installation disks. Disk "Installationsdiskette.dsk" was modified because original kernel file was broken. I choose the kernel file from the us version.
