HJSplit 1.4
http://vetusware.com/download/HJSplit%201.4/?id=13981
HJSplit is a little Windows95/NT program useful for splitting large compressed or uncompressed
files into smaller chunks and joining them afterwards. The smaller chunks are more transportable
on disks or data-communications connections. When an error occurs, not the whole large file has
to be transported or copied again.

WindowBlinds 1.01
http://vetusware.com/download/WindowBlinds%201.01/?id=13982
WindowBlinds is the first utility of its kind. It lets you decide how Windows 95, 98, & NT 4 look.
You can change the style of title bars, buttons, toolbars and much more. It gives you total control
over your graphical user interface. WindowBlinds is a component of Object Desktop.
