Autodesk AutoCAD r10_c5 for Macintosh

http://vetusware.com/download/Autodesk%20AutoCAD%20r10_c5%20for%20Macintosh/?id=14165

This is an M68k native port of AutoCAD for the Apple Macintosh. It was one of only three versions released for early Macintosh computers. The Macintosh platform port was plagued with problems and lagged behind the DOS and Unix versions. Version 10 for Macintosh was the initial release. It features a user interface identical to the DOS version, including its command line usage. It was slower than the DOS version on comparable hardware. Requires a minimum of Mac II, IIx, or IIcx with 4 megabytes of RAM, hard disk with 40 megabytes free, monochrome or color monitor, and Macintosh System 6.0.2 or later. This version does not require an FPU. Not copy protected. No serial key needed. Includes a hard disk volume that may be mounted in an emulator.

Autodesk AutoCAD 11_c1 for Apple Macintosh

http://vetusware.com/download/Autodesk%20AutoCAD%2011_c1%20for%20Apple%20Macintosh/?id=14166

This is an M68k native port of AutoCAD for the Apple Macintosh. It was one of only three versions released for early Macintosh computers. The Macintosh platform port was plagued with problems and lagged behind the DOS and Unix versions. Version 11 for Macintosh features speed improvements, better UI integration, compatible with System 7.0 and Apple Quadra Macintoshes. This version requires at least an 68881 FPU. To run on a 68k Macintosh without an FPU, obtain and install the product "Software FPU". To try running on a PPC Macintosh obtain and install the product "PowerFPU". This application has poor compatibility. If it freezes up while starting at the configuration window, try disabling extensions. Was able to run it under MacOS 7.1. May not run properly on MacOS 8 or later. Not copy protected. No serial key needed. Includes 11 3.5" 800k floppy disk images.

Autodesk AutoCAD 12_c3 for Apple Macintosh

http://vetusware.com/download/Autodesk%20AutoCAD%2012_c3%20for%20Apple%20Macintosh/?id=14167

This is an M68k native port of AutoCAD for the Apple Macintosh. It was one of only three versions released for early Macintosh computers. The Macintosh platform port was plagued with problems and lagged behind the DOS and Unix versions. Version 12 for Macintosh features vastly improved UI integration and more speed increases. Release 12 was the last version for early Macintosh computers. AutoCAD was not revived on the Macintosh platform until Apple started using Intel CPUs and Mac OS X. This version requires at least an 68881 FPU. To run on a 68k Macintosh without an FPU, obtain and install the product "Software FPU". To try running on a PPC Macintosh obtain and install the product "PowerFPU". Not copy protected. No serial key needed. Includes seven 3.5" 1.44mb Macintosh formatted floppy disk images.
