Visio 2000 Professional

<http://vetusware.com/download/Visio%202000%20Professional/?id=14177>

Visio is a flow-chart diagramming program for Microsoft Windows originally from Shapeware/Visio Corp. Visio was specifically designed as a flow charting tool rather than a generic drawing tool. It featured easy to use drag-and-drop diagram creation, and shipped with a wide variety of stencils. In 2000 Visio Corp was acquired by Microsoft. It competed with Aldus Intellidraw and Micrografx Snapgraphics and Meta Software's MetaDesign.
