An old dutch text adventure where you select words from a list (you don't type the words as you do in a regular text adventure)

Digitalk Smalltalk-V 1.2

This was probably the first widely distributed version of Smalltalk now we have Squeak but it is worthwhile to see the smalltalk decompiler included in here. Also included are 2 articles by Alan Kay on the early history of Smalltalk - 1 saving you the \$15 to buy for JSTOR or the ACM - splitters!!
