Novell Netware 2.15c 2.15c

[//vetusware.com/download/Novell%20Netware%202.15c%202.15c/?id=14514](http://vetusware.com/download/Novell%20Netware%202.15c%202.15c/?id=14514)

This ISO contains all the 360k floppy images needed to build a basic Netware 2.15 Rev C server, plus many more disks for bridges, print servers, and clients. The images were created using WinImage 9. Hopefully the LABEL of the floppies comes through, as the label of the floppy disk (like SHGEN-1) is critical to being able to use the floppies.
