Visual C++ (Dec Alpha) 4.0

http://vetusware.com/download/Visual%20C%2B%2B%20_Dec%20Alpha_%204.0/?id=14896

This is Visual C++ 4.0 for the Dec Alpha. This is for Windows NT, and brings a lot of Windows 95 programming tools to the Dec Alpha!

Visual C++ (i386) 2.0

http://vetusware.com/download/Visual%20C%2B%2B%20_i386_%202.0/?id=14899

This is the Visual C++ 2.0 This includes the 32bit build environment for Windows NT, along with support for Win32s. Also included on the CD is Visual C++ 1.52 for developing Windows 3.1 and MS-DOS. Also included is a 16bit 286|DOS-Extender allowing you to write 16bit protected mode MS-DOS based programs.

Visual C++ (MIPS) 2.0

http://vetusware.com/download/Visual%20C%2B%2B%20_MIPS_%202.0/?id=14898

This is Visual C++ 2.0 for the MIPS procesosr. This brings the build environment up to parity with the Windows NT 3.5 SDK. Included is a visual debugger, along with online help. This is a comparitively light weight environment compared to the Visual C++ 4.0 compiler

Visual C++ (PowerPC) 4.0

http://vetusware.com/download/Visual%20C%2B%2B%20_PowerPC_%204.0/?id=14897

This is Visual C++ for the PowerPC processors running Windows NT. This brings a lot of Windows 95 controls to Windows NT. This won't work on Macintosh computers but rather the few PowerPC machines that can run Windows NT.
