#### DeskMan/2 1.51b

<http://vetusware.com/download/DeskMan2%201.51b/?id=15222>

DeskMan/2 is a "Desktop Enhancement" for OS/2. It includes: DeskMan/2 (workplace shell manager & extensions), VUEMan/2 (virtual desktop manager), and DM2Image (configuration snapshot utility). If you've ever wanted Linux style virtual desktops in OS/2, this is your solution.

#### Footprint Works for OS/2 1.0

<http://vetusware.com/download/Footprint%20Works%20for%20OS2%201.0/?id=15223>

An office suite for OS/2. Features include a word processor with spell check, synonyms, search, replace, hyphenation, word count, headers, footers, mail merge, styles, two-page view, table utility and more, spreadsheet with 59 functions, auto recalc, 12 cell formats, cell protection, cell notes, 1,024 rows, split view, links, graphs in spreadsheet, etc. Chart Maker with 9 chart types, titles, legend, drawing tools, outline coloring, data input or use spreadsheet, set series, axes, tick marks and more, Data Filer database program that can design databases, forms, set data entry field order, and more, Report Writer with automatic data column formatting from database fields, break columns, report preview, sort, set titles, summary options, and more. It also has on-line help. Footprint Software, Inc. later developed versions 2.00 and 3.00 of IBM Works, which were included in the Bonus Packs of OS/2 Warp 3 and OS/2 Warp 4 respectively.

#### R:BASE for OS/2 2.1

[http://vetusware.com/download/R\\_BASE%20for%20OS2%202.1/?id=15226](http://vetusware.com/download/R_BASE%20for%20OS2%202.1/?id=15226)

R:Base was a popular relational database that that competed with Ashton Tate's dBASE product.

#### Wingz 1.1

<http://vetusware.com/download/Wingz%201.1/?id=15225>

A "graphic spreadsheet" application for 16-bit OS/2. "Wingz is easy to use, high performance software for business and technical professionals. Ideal for marketing, sales, and scientific scenarios." Includes the macro language: HyperScript.
