Q&A Write 1.02

http://vetusware.com/download/Q_A%20Write%201.02/?id=15476

Q&A Write is a word processor designed to accompany Symantec's Q&A database software product. Q&A Write is designed to resemble PFS:Write, and excelled in the areas of ease of use and laser printer support. It also includes mail-merge, keyboard macros, math calculations, envelope printing, spell-checking, and a Lotus 1-2-3 interface. Included are images of both the 3.5" and 5.25" disks. The disk labels say version 1.02, but the installed application says version 1.01. Not sure which is correct.
