SdShredder (file shredder) 1.9.0.0

[http://vetusware.com/download/SdShredder%20\\_file%20shredder\\_%201.9.0.0/?id=16069](http://vetusware.com/download/SdShredder%20_file%20shredder_%201.9.0.0/?id=16069)

A safe file shredder for Windows. Works with Windows 7 + 10. MUST BE STARTED WITHOUT ELEVATED PRIVILEGES, OR DRAG + DROP WILL NOT WORK. Long explanation: UIPI (User Interface Privilege Isolation, a variant of UAC, User Account Control). Because of "security" reasons, UIPI disables drag and drop from medium integrity processes (Explorer) to high integrity (aka elevated) processes by filtering out most window messages, including those required for drag and drop. In essence drag and drop from Explorer to your elevated application does not work.

Unique hex editor for Windows with scriptable extensions to view Ntfs, Fat32, XOR encrypted files etc. Unpack scripts package to the 'scripts' folder of your installation. NOTE: author stopped development in 2007 and there is no support. Snatched from the website before it went offline. Works with Windows 10.
