RealJukebox 2.0

<https://vetusware.com/download/RealJukebox%202.0/?id=16454>

RealJukebox is the sister product of RealPlayer from RealNetworks. (Contains both RealPlayer and RealJukebox packaged together.) It falls into a crippled freemium software category, and has way too many features and buttons (some are unnecessary) compared to other programs from today. It still plays MP3 files, and also plays files created with the proprietary RealAudio format. Sourced from the Internet Archive Wayback Machine.
