Dashboard 3.0 3.0

<https://vetusware.com/download/Dashboard%203.0%203.0/?id=16494>

Dashboard for Windows 3.00. Developed and produced by Starfish Software. It is a convenient push-button utility for Windows 3.x, that gives you quick access to maximum control over Windows applications. Dashboard includes these features (and many more): Convenient menus and buttons for launching programs. Drag-and-drop support for printing, plotting, and faxing. Miniature screens that make it easy to work with several full-screen programs at once. An alarm clock with a built-in snooze alarm. And "At a glance" feedback to let you know which programs are running and how much memory you are using. This is a .RAR that contains the file in .IMG (floppy image) format. Enjoy!
