Circuit Maker 2000 SP1 2000 SP1

<https://vetusware.com/download/Circuit%20Maker%202000%20SP1%202000%20SP1/?id=16561>

CircuitMaker is an easy-to-use schematic design and simulation tool. This product was discontinued in 2000 after being bought out by Altium, and is not related to the current software of a similar name. P.S.: Works on Windows 9x and NT 4.0 and up Works on Windows 10 2004 too, crashes when you try to open it, fix is to close and open again.
