Byline 1.0

<https://vetware.com/download/Byline%201.0/?id=16604>

Byline was an early desktop publishing program targeted squarely at DOS users. The box proudly proclaims: "Because Byline works the way you do, you don't waste time with a mouse or a new graphics environment." It does not support mice at all. It has a WYSIWYG preview, but the interface is not interactive.

Micrografx Graph Plus 1.2

<https://vetware.com/download/Micrografx%20Graph%20Plus%201.2/?id=16606>

Micrografx Windows Graph was an application for creating business graphs and charts. It has much in common with Micrografx's other freeform drawing products, In-a-vision/Designer and Micrografx Windows Draw.

Microsoft Excel 1.00 for Macintosh

<https://vetware.com/download/Microsoft%20Excel%201.00%20for%20Macintosh/?id=16605>

This is the very first Microsoft Excel release. Excel replaced Microsoft's earlier Multiplan spreadsheet. It gained popularity on the Macintosh where Lotus Jazz had failed. Excel was only available for the Macintosh until version 2.0, which was released for Microsoft Windows 2. Excel 1.00 is copy protected. Later Excel 1.x releases were not copy protected.

ViaNet 3.06.18-1

<https://vetware.com/download/ViaNet%203.06.18-1/?id=16602>

Vianet, from Western Digital, is a cross platform peer to peer networking system that offers simplicity and ease of use.

WordPerfect Executive 1.0 (6-5-1990)

https://vetware.com/download/WordPerfect%20Executive%201.0%20_6-5-1990_/?id=16603

WordPerfect Executive is a stripped down version of the WordPerfect word processor optimized for use on 3.5" floppy-only laptops. Also includes a spreadsheet, calendar, calculator, card file, and telephone list.
