ColorWorks 2.0

Digital painting application for OS/2 Warp.

VisPro C++ 3.01

<https://vetusware.com/download/VisPro%20C%2B%2B%203.01/?id=16670>

An IDE and rapid application development tool for OS/2 Warp. Supports several of the more popular C++ compilers (including VisualAge and MetaWare). This is an upgrade version, so the serial included is actually for version 1.0, but will work to activate this version.
