South Beach 101

<https://vetusware.com/download/South%20Beach%20101/?id=17037>

This is the South Beach Citrix beta, build 101. This is based around a beta version of Windows NT 3.5. Included in this version is support for async terminals, and text mode connections. The built in CD-ROM driver has issues with large transfers and will most likely fail to install. The best solution is to use the MS-DOS 'winnt /b' setup option.
