TUBA

<https://vetusware.com/download/TUBA/?id=17062>

Digital Sky Atlas designed for use with binoculars, with hundreds of interesting targets. Conceived by Dean Williams and Phil Harrington (the author of the outstanding book "Touring the Universe through Binoculars", Wiley Science Editions). Very nice astronomy software that can be used in today's systems in "Compatibility Mode" with XP SP3. (incl. program + update)
