Super ZZT 2.0

Super ZZT! by Tim Sweeny is a surprisingly addictive action/puzzle character graphics game for the IBM PC. This is a more advanced, larger, and even more fun version of the classic ZZT adventure. Includes three worlds: World 5: ZZT's Proving Grounds, World 6: The Lost Forest, and World 7: ZZT's Monster Zoo. Requires 512K of RAM and DOS 3.0. While playable on monochrome, it looks awful.

Ultima IV 4

Ultima IV was an early and extremely popular one-player role playing game. It was one of the first with a complex storyline, ethical choices and consequences, and a coherent world of runes, magical reagents, and moon phases. Note that this ZIP file is better than the typical download of Ultima IV for the IBM PC. Usually, the PARTY.SAV file is messed up because the game was played before the disk was copied. The version here on vetusware.com has a pristine PARTY.SAV. Additionally, while the disk image itself fits on a 1.44 MB floppy, Ultima IV was meant to be played with the user referring often to the illustrated manuals and maps. For that reason, this upload includes PDF scans of the documentation as well.
