It works under Windows 9x/ME/NT/2000. If you are using Windows95 then you must have at least Win 95B (with installed USB Supplement and Internet Explorer 4 or higher).

DiskWrite 1.02

DiskWrite is a utility for writing floppy disk images within Windows 95, 98, NT4 and Windows 2000. DiskWrite is useful for creating bootdisks for installing Linux, FreeBSD or any other operating system. It is an ideal alternative to the MS-DOS - based rawrite.exe and fdimage.exe, both in ease of use and OS compatibility.
