Ghost Solution Suite 2.5

<https://vetusware.com/download/Ghost%20Solution%20Suite%202.5/?id=17505>

Symantec Ghost Solution Suite 2.5. Supported central management of networked computers for the purpose of applying OS images to one or hundreds of computers simultaneously. Worked flawlessly up to and including Windows XP. Less successful but still worked with 32-bit Windows 7 when used with domain joined computers.
