Creature Shock

<https://vetusware.com/download/Creature%20Shock/?id=17804>

Sci-fi first-person shooter game. Tested and run on DOSBox-X under Windows 10 Host. Important note: Does not run properly on Modern Hardware, without modifications: In DOSBox-X -- Run "DOSBox-X Configuration Tool" -- Select "CPU" and change cycles from "auto" to "35000" -- Change back to "auto" when done playing. Should probably not have problems on real vintage hardware. If problems are still encountered, kindly refer to online forums for tips/instructions.

day of the tenticle

*.zip file contains the game, "Day of the Tentacle." Often misspelled as "day of the tenticle." I've listed the name as such, so that it may be found even with the erroneous spelling. Simply extract contents in the *.zip file and type "TENTACLE.EXE" in the folder where files have been extracted to in DOS.

One Must Fall: 2097
